Fig. 1 Experimental results of the QRCSSS. (a): $\mathbf{H}$; (b): $\mathbf{C}_1$; (c): $\mathbf{C}_2$; (d): $\mathbf{H}_y$; (e): $\mathbf{S}_1$; (f): $\mathbf{S}_2$; (g): $\mathbf{H}'_y$; (h): $\mathbf{H}'$ ($\mathbf{H}'_y$ is processed by the contrast enhancer); (i): The difference between the $\mathbf{H}$ and $\mathbf{H}'$, where white modules denotes difference. (j): $\mathbf{S}'_1$ ($\mathbf{S}_1$ is processed by the contrast enhancer); (k): $\mathbf{S}'_2$ ($\mathbf{S}_1$ is processed by the contrast enhancer); (l): The difference between the $\mathbf{C}_1$ and $\mathbf{S}'_1$, where the white module denotes difference. (m): The difference between the $\mathbf{C}_2$ and $\mathbf{S}'_2$, where the white module denotes difference.
